

VIDEO VISITS

Visiting your doctor has never been so convenient.

What is a Video Visit? It's simply a way of seeing the doctor without actually having to go to the doctor. With the stroke of a few keys or swipes of a finger, you connect live with your Kaiser Permanente healthcare team conveniently from your home or office.

Is it secure? Your privacy is absolutely critical to us. That's why all Kaiser Permanente Video Visits are digitally encrypted, assuring only the participants of the visit can see and hear the meeting. Video Visits are never recorded.

Will I be able to see and hear? A strong Internet connection will help to ensure a quality video experience. Though not required, a headset is recommended for better audio quality. In all cases, it is best to join your Video Visit from a quiet, well-lit space.

What do I need to get started?

From my computer?
